## Durability, security and high resistance

### Introduction

The ultrasonic baths are the best solution to obtain a perfect cleaning on materials of all kinds.

These are some of the benefits:

- Quality of microscopic cleaning.
- Saving of time approximately of 80 % in comparison with a traditional system.
- Saving water and detergents.
- Avoids the risk for inhalation and so common contact in the use of solvents and alkaline detergents.
- Ecological advantages.
- Protection of the materials. The surface will never remain damaged.

---

### Applications

- Jewelry.
- Instruments and equipment and Dental Surgery.
- Plastic materials, glass, porcelain, glass ...
- Tools, machinery tools.
- Repair shops. Costume jewelry, cutlery, watches ...
- Electronics, printed circuits...
- Optics in general, contact lenses.
- Auto Accessories, injectors ...

## Features

Ultrasonic frequency: 42,000Hz.

Tank material: stainless steel SUS304.

Quiet, solid states circuitry.

Timer: 5 cycles, with digital time display.

Carcasa de plástico muy resistente.

Es el primer baño que incorpora un a ventilación para operaciones prolongadas.

## Specifications

Model	4800
Ultrasonic frequency	42000 hz
Tank material	stainless steel. SUS304
Tank capacity	1.375 ml
Timer	5 cycles(180/280/380/480/90 seconds)
Power supply	AC 100 ~ 120V, 50 / 60Hz AC 220 ~ 240V, 50 / 60 Hz
Power	60W (110V) / 70W (230V)
Unit size	230 X 180 X 160 mm (W x D x H)
Product Weight	1.75kg
